Mark Tucker BA MA

7 January 2022

Dear Parent/Carer

The Welsh Government has made available a free and voluntary programme of asymptomatic COVID-19 testing in education and childcare settings across Wales. This offer is available to all students in Years 7 to Year 13.

Along with the primary infection control measures we have implemented, such as social distancing and good hand hygiene, testing will allow us to provide some additional reassurance to the wider school community.

Up to one in three people who have COVID-19 have the virus without symptoms, so could be transmitting the virus unknowingly. Part of controlling the spread of the virus requires identifying those infectious individuals who are not showing and symptoms and asking them to self-isolate. Lateral Flow Device (LFD) tests have been widely and successfully used to detect COVID-19 in asymptomatic individuals. The speed and convenience of LFD tests supports detection of the virus in asymptomatic individuals who would not otherwise be tested. They are clinically approved and are crucial in the fight against the virus.

As the tests are more sensitive with higher viral loads, there is a risk of returning a negative result when viral loads are low (e.g. in the early stages of infection). This is why it is recommended that three LFD tests are taken each week on a Monday, Wednesday and a Friday, to enhance detection by picking up any cases, which were not detected during the first test, and to catch any new infections.

If you test positive using a LFD, it is likely that you are infectious and you must self-isolate immediately. **Do not come into school and inform the school of your positive result.** You should book and take a Polymerase Chain Reaction (PCR) test within 24 hours of your positive LFD test result. Contact tracing will be triggered following a positive LFD and you will be required to self-isolate until you receive your PCR test result. If the PCR test result is positive you will have to self-isolate.

A negative LFD result should not be read as a means to relax or ignore social distancing or other virus prevention measures intended to reduce transmission – LFD is an additional tool that contributes to reducing risk.

### How the tests work

If you agree to take part, a consent form will need to be completed and returned, you will then arrange with the school to collect a pack of LFD test kits which will enable self-testing from home. **Tests should be taken 3 days a week (Monday, Wednesday and Friday) before attending school.** The LFDs supplied do not require laboratory processing and can provide a quick result in around 30 minutes. Comprehensive guidance on self-testing is contained in the '*Instructions for Use*' leaflet which comes with the test kit.

Once the test has been conducted, each test result must be logged online at [www.gov.uk/report-covid19-result](http://www.gov.uk/report-covid19-result). **The school must also be informed if the result is positive by emailing the name and form of your child to [EdwardsL349@hwbcymru.net](mailto:EdwardsL349@hwbcymru.net) or call 01633 654111.**

### **Purpose of testing**

It is important to highlight that the purposes of the testing policy in education and childcare in Wales is to complement the primary control measures (such as social distancing and face coverings) that have already been put in place to enable face to face learning to continue and to:

- Rapidly identify those who are regularly on site during learning hours, who are unknowingly carrying the virus and ask them to self-isolate to reduce disruption to face-to-face education.
- Complement symptomatic results data with asymptomatic results data to provide a picture of infection rates as marker for the effectiveness, and implementation of, primary control measures and to assist in the early identification of clusters. In addition to a range of other data and public health advice, this information can be used to inform national policy decisions.

The testing policy for education should not be viewed as a 'test to enable' or 'test to return' to face to face learning i.e. it is not a condition of coming on to the site or accessing learning. Additionally, this testing offer is entirely voluntary.

### **Consent / Privacy**

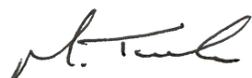

All individuals wishing to take part should familiarise themselves with the testing process and privacy notice, if you choose to participate, you are committing to self-administer the test and provide results for all tests (negative or positive).

With our primary protective measures and testing, we will help to reduce the spread of the virus. I am therefore strongly encouraging all staff and students to take the tests. However, anyone who chooses not to participate should still attend school if they are not displaying symptoms.

People who decline to participate in this testing programme should follow the usual national guidelines on self-isolation and should get tested if they show symptoms.

A consent form can be collected by your child from Student Reception and when completed should then be returned to Student Reception.

Yours sincerely

Mr M Tucker  
Headteacher
